

IBC range for the foodstuff industry

Type 410 – Standard IBC

1,000 litre tank of stainless steel with screw lid. Construction of the outlet allows connection of different couplings. Suitable for optimal transportation and storage of edible oil or liquid eggs, as well as spirits and food ingredients.

Type 433 / 434 – Electrically heated and insulated IBC

1,000 litre IBC with screw lid. Additional heating system and insulation for tempered foodstuff liquids, e.g. chocolates, edible fat and glucose. 2,000 Watt power supply. Maximum working temperature of 120 °C. Schuko plug (type 433) or CEE-plug (type 434).

Type 460 / 490 – Aseptic foodstuff container (1,000 litre)

Designed for the aseptic transportation and storage of foodstuff. Perfect for dairy products, sauces, marinades and fruit concentrates. Screw lid and outlet with DN 50 milk thread. Approval for dangerous goods available (type 490).

Type 465 / 495 – Aseptic foodstuff container (500 litre)

Designed with smaller quantity volumes. Advantages with regards to storage and freight costs. Also incorporating savings in connection with nitrogen blankets and operational advantages. Approval for dangerous goods available (type 495).

Type 468 – Aseptic foodstuff container (800 litre)

Used for the transportation of high-viscose products, e.g. curds or yogurt. Side rake of 45° as well as an DN 80 outlet allows complete product recovery.

Type 470 / 471 – Agitator

Available as additional equipment for IBC types 410 / 433 / 434. Twin blades avoid sedimentation of the product and ensure a constant temperature distribution within the IBC. Simply clips onto the manlid of the IBC. Delivery in a secured and closed transport box.
